# Aluminium window shutters

- 1 Window shutters are available with a standard or renovation frame and that is why they meet the requirements of all European markets.
- 2 You can choose from FIX, side-hung, sliding and slide and fold window shutters.
- 3 You can also choose a frame - the one around, from the left or right side or even in the top part of a window shutter. It is recommended to apply a frame especially while installing in balcony windows or windows with wide protruding windowsills.
- 4 Window shutters can be ven 2,5 m high.

- 5 In order to meet your needs and requirements, we offer window shutters with moveable and fixed louvres. The latter ones enable to control the air flow and amount of sunlight that enter the inside. We also provide stave wood panel (the so-called wood-like panel)
- 6 Soon our offer will include an option to equip window shutters with fittings that will allow to install a shutter panel directly in the wall or insulation layer
- 7 Window shutters are available in 27 basic colours and at an individual enquiry in any RAL colour. We also offer window shutters in wood-like colours.
- 8 Our window shutters are made of high quality aluminium and that is why they are stable, aesthetic and they do not require maintenance as it is necessary in case of wooden shutters.
